Box Plots or Box and Whisker Diagrams
These are diagrams for presenting data showing:
The least valve, the louerquartile, the median
the upper quartile and greatest value

| Lowest value | 24 |  |
| :--- | ---: | :--- |
| $L Q$ | $Q_{1}$ | 36 |
| Median | $Q_{2}$ | 42 |
| $U Q$ | $Q_{3}$ | 50 |
| Highest value | 54 |  |

Comparing Data Samples With Box plots
Maths Test Results
Girls

Boys

On average the girls pertormed slightly better
than the boys. They had a median score of 46 compared to the boys median of 44

The girls results were more varied than the boys' They had an IQR of 14 compared to the boys' I QR of 8 .

Always compare the medians as a measure of location and the $I Q R S$ as a measure of spread.

Drawing a Box plot from a Stem Leaf Diagram
$\begin{array}{lllll}43 & 37 & 59 & 45 & 56\end{array}$
$\begin{array}{lllll}62 & 45 & 65 & 51 & 50\end{array}$
$\begin{array}{lllll}32 & 58 & 45 & 62 & 43\end{array}$

$$
\begin{array}{l|llll}
3 & 7 & 2 & & \\
4 & 3 & 5 & 5 & 5 \\
5 & 3 \\
5 & 9 & 6 & 1 & 0 \\
6 & 2 & 5 & 2
\end{array}
$$

| Lowest | 32 |
| :--- | :--- |
| $Q_{1}$ | 43 |
| $M$ | 50 |
| $Q_{3}$ | 59 |
| Highest | 65 |
