Higher tier mock revision list

Fractions with x + - and ÷
ratio sharing
percentage change
speed
estimation
surface area
coordinates problem
transformations
area with ratio
indices including fractional and negative
boxplots
circle theorems
proof (odd and even)
surds
inverse and direct proportion
factorising
algebraic fractions
ratio with probability
curve transformations
y = mx + c problem
solving inequalities

indices (basic rules)
HCF/LCM
equation of straight line
percentages and ratio
drawing quadratic graph
percentage change
transformations
two way table
compound interest problem
vectors - basic
functions
proportionality graphs
circle theorems
tangent to graph/gradient
probability tree diagram
circle graph
histogram
trigonometry in 3D
volume (sphere) changing the subject
surds
upper/lower bounds in calculation

scattergraphs
expand and simplify
probability tree diagrams
area
trigonometry
probability
solving equation
interior/exterior angles of polygons
standard form
percentage increase/decrease
LCM problem
compound percentages (multipliers)
gradient of straight line
similar shapes - length/area/volume
number of ways
area under a curve
sequences including quadratic
simultaneous equations
sine/cosine rule
iteration
solving quadratic equation in a
    problem with trigonometry
venn diagrams
congruency
